

## QUALIFIED STORMWATER MANAGER (QSM) TRAINING

**Course Description:** This two-day training program has been developed by Aqua Terra Environmental, LLC to meet the knowledge and skills required to be a Qualified Stormwater Manager including implementation of the Stormwater Management Plan (SWMP) and conducting routine inspections. The Qualified Stormwater Manager must be skilled with control measure evaluation and application to effectively implement the SWMP. Certificates of completion are provided to each student who successfully completes the program.

**Learning Objectives-** Upon successful completion of the training program, you will be able to:

- Apply the requirements of the COR400000 General Permit to a construction site.
- Describe the responsibilities of the Qualified Stormwater Manager.
- Evaluate a SWMP for completeness & adequacy to facilitate implementation.
- Select adequate control measures based on site conditions and pollutants.
- Evaluate implemented control measures for proper installation, maintenance, application and adequacy for the site conditions.
